PROFESSIONAL SUMMARY

Systems Administrator / Technical Support Engineer with 2+ years of experience in **Windows Server** and **Linux** environments, **multi-server monitoring**, and **high availability** systems. Skilled in **incident management (P1/P2), root cause analysis, performance optimization, system patching**, and **security compliance**. Proficient with **Datadog, SolarWinds, BigPanda, HPE SiteScope**, and **ServiceNow ITSM**. Experienced in **emergency response, SLA-driven support**, and maintaining **technical documentation** to ensure operational continuity.

WORK EXPERIENCE

Sr. System Engineering Support*, IQVIA, Bengaluru** ***Dec'2022– Dec'2023

A leading global provider of advanced analytics, technology solutions, and clinical research services to the life sciences industry.

- Managed enterprise **Windows** and **Linux servers**, ensuring **high availability** and **performance optimization** using **Datadog, SolarWinds Orion,** and **BigPanda**
- Performed **incident management for P1/P2 issues**, conducted **root cause analysis**, and escalated critical incidents.
- Administered **server lifecycle**: onboarding, configuration, maintenance, and decommissioning of servers.
- Collaborated with **security, networking, and operations teams** to maintain **security compliance** and operational continuity
- Developed and maintained **SOPs** and **knowledge base** to reduce incident resolution time and onboarding duration.

Key Achievements:

- Reduced alert noise by **30%** through tuning and suppression rules
- Maintained **99.5% monitoring coverage** across 200+ servers
- Recognized for managing the highest volume of critical alerts efficiently

Associate Professional Software Engineer*, DXC Technology, Chennai** ***Jun'2021– Nov'2022

DXC Technology is an American technology company it provides technology consulting, outsourcing, and support services to global customers, with a focus on modernizing IT, optimizing data architectures, and ensuring security and scalability across public, private, and hybrid clouds23.

- Installed and configured **HPE SiteScope** on servers and other infrastructure components. This included setting up monitoring agents, configuring monitoring parameters, and ensuring that HPE SiteScope is integrated with the systems and applications to be monitored.
- Monitored the **network infrastructure, servers, applications, and services** using the HPE SiteScope tool. This involved keeping track of performance metrics, service availability, and other key indicators to ensure optimal performance and **identify potential issues like alert suppression, onboarding, and decommissioning of Windows/ Linux servers.**
- Handled inbound technical tickets and conducted outbound follow-up calls for issue resolution.
- Diagnosed and analyzed customer-reported issues related to Broadcom products and services. Understood the problem, gathered relevant information, and used technical knowledge to identify the root cause of Symantec products which included Data Loss Prevention, Endpoint Protection Manager, and e-mail security.
- **Assisted the users with the installation, configuration, and troubleshooting of Symantec/Broadcom products, including Data Loss Prevention, Endpoint Protection Manager, and Email Security.**
- Solved P1 and P2 cases within **SLAs**, guaranteeing minimal downtime for clients.
- Guided users through upgrades to new versions and assisted with post-upgrade issue resolution. Identified and prioritized cases for unresolved issues, in collaboration with higher-level support teams for escalation.

TECHNICAL SKILLS

System Administration: Windows Server, Linux (RHEL), Server Lifecycle Management
Monitoring & ITSM Tools:
ServiceNow, BigPanda, Datadog, SolarWinds Orion, HPE SiteScope, Wolken
Security & Enterprise Tools:
Broadcom/Symantec (DLP, Endpoint Protection Manager, Email Security)
Cloud & Infrastructure:
Microsoft Azure (AZ-900 Certified), Oracle Cloud Infrastructure (Foundation), Windows Server, Linux
Performance Optimization: Resource monitoring, alert tuning, capacity analysis
Technical Areas:
Incident Management, SLA Management, Network Troubleshooting, Log Analysis, Root Cause Analysis, Alert Management, API basics
Documentation & Knowledge Management: SOP development, knowledge base creation
Collaboration & Communication: Cross-functional coordination with operations, networking, and security teams
Programming / Scripting: Python, SQL

CERTIFICATES

Microsoft Certified Azure Fundamentals – Microsoft, January 24, 2022
Oracle Cloud Infrastructure Foundations

ACADEMIC QUALIFICATION

Master of Science in Computer Information Systems, New England College, New Hampshire, GPA: 3.58/4; Oct'2025
Bachelor of Engineering in ***Electronics & Communication Engineering***, Annamacharya Institute of Technology & Sciences, Tirupati, Jawaharlal Nehru Technological University; CGPA: 7.53 /10; Jul'2021
